

Hailey Naicker

ST10385429

Milestone 1:

1. Client Needs Description:

Empowering the Nation, a training effort for domestic workers and gardeners, requires a comprehensive web page and mobile app to advertise their services, manage course selections, and deliver information to potential consumers. The platform should reflect the business's professionalism and purpose. Users should simply navigate and get information on courses, fees, and contact details.

2. User-Centred Design:

We prioritise user experience and accessibility in our design approach. The interface will be simple, allowing both web and mobile users to easily navigate and use the platform's capabilities. Users will be guided to appropriate sections by clear symbols and menu items, resulting in a more seamless experience.

4. Logo Design:

Empowering the Nation's logo should express the organization's aim to elevate and educate. It uses an image of an open book layered with a stylised leaf to mix simplicity with symbolism. This encompasses both learning and growth, which are important to the initiative's goal.

(Our company)

(Empowering the nation)

Conclusion:

The proposed web page and mobile app design is consistent with the Empowering the Nation objectives. Our approach is user-centric, assuring easy navigation, clear course information, and a faster price calculating method. The logo design graphically represents the company's mission. Our wireframes describe the platform's layout visually, delivering a consistent user experience.
